## **Support Choice - Oppose Vaccine Mandates.**

Vaccine mandates remove the right of the individual to make a choice. They are coercive and unethical.

The government has announced that it is planning to mandate the covid vaccine for all NHS frontline staff by Spring 2022 with the threat of job losses for those who are not vaccinated.  
This will result in staff shortages and affect patient care.

### **Informed Consent**

The principle of consent is an important part of medical ethics and international human rights law. Under the new legislation, NHS workers will be denied this fundamental right to give their consent.

### **Right to Medical Privacy**

Your vaccination status is confidential medical information.  
You are not obliged to disclose it to your employer.

### **Your Rights: Our Support**

By mandating covid vaccines for all staff, the NHS is in breach of several Acts and laws that are aimed to protect employees. If you are concerned about the impact this may have on you or the NHS and do not believe that anyone should be forced to have the covid vaccine, we have prepared resources to support you.
